

**HAZARD COMMUNICATIONS POST TEST**

(Answer the questions by circling the correct response)

1. True False      The Hazard Communications Standard gives you a right to know what hazardous chemicals are in your workplace.
2. True False      A chemical's harmful effects can accumulate slowly over an extended period of time.
3. True False      Oxygen piped into operating and recovery rooms is a hazardous chemical.
4. True False      You can find out which hazardous chemicals are used in your workplace by consulting your employer's Hazard Communication Program.
5. True False      The MSDS gives detailed information about a material's hazards and how to control them.
6. True False      First aid and emergency information is sometimes listed at the beginning of the MSDS where you can find it fast.
7. True False      The MSDS tells how to clean up spills and leaks.
8. True False      The best time to become familiar with a chemical's MSDS is when a crisis occurs.
9. True False      You will receive additional training whenever you work with chemicals that could present new hazards.
10. True False      Creating a safe workplace is entirely your employer's responsibility.

**ACKNOWLEDGMENT STATEMENT**      By signing this completed evaluation, I acknowledge having received my training on Hazard Communications. I understand that it is MY responsibility to read the Self-Study Guide and answer the evaluation questions on MY own.
